

Photography Workshop in Paris

Dates : 15th & 16th of May 2016

You're invited to join Olivier Lalin, CEO of WeddingLight for an amazing two days intensive photographic workshop in Paris, city of light. Experience Parisian life, love and culture in France while enjoying a "hands-on", intensive 2-days wedding photographic workshop with a talented, experienced and recognized award-winning, Paris based photographer. The workshop will be conducted by Olivier in English.

A casual atmosphere will combine Paris assignments on location, photo shoot at some of Olivier's favorites spots, and in-class presentations covering a wide variety of topics related to lifestyle wedding portrait photography, usage of various lighting techniques, processing RAW files, black and white conversion and creative image post production with different styles & techniques - all being most relevant to success in wedding photography today. This workshop is ideal for anyone interested or beginning their wedding photography business or the already accomplished photographer looking to revamp their creativity, skills and approach.

Olivier has 20 years of experience in editorial and wedding photography. His photographic style is natural, elegant & classic. He will share his professional insight on wedding photography "must have" skills. During those two days, Olivier will introduce various lighting techniques hands on during photo shoots in the streets of Paris, with 2 agency models, wedding gowns, hair and make up artists. The aim is to build a Portrait & Life Style mini book that will help you develop your wedding business.

We look forward to sharing a couple of days with you in Paris, France.

Schedule of Events

Day I

Day I Schedule & meeting point will be send out prior to the workshop.

The first day is all about “taking pictures”; working with & directing models, the use of light, composition, being creative and efficient with your photography. We will be on location in the streets of Paris during one of Olivier’s style shoot.

Style shoot exemple published in “French Wedding Style”

The second day is about class instruction & understanding how to optimize your files. The teaching will incorporate topics such as uploading files, processing the raw images using lightroom and Nik software, first look at the images with discussion and more.

Each student must have camera gear, flash, laptop with photoshop, lightroom and nik software suite included. Olivier will present photographic techniques using daylight, reflectors and flash with a couple on location in the streets of Paris + a lifestyle photoshoot the second day. Students will practice under Olivier’s guidance. First day will mainly be spent on location in the streets of Paris while the second day is all about processing files and making sure you get the best result, finding the right look & style of your wedding images for your business. Olivier’s approach to photography is fun and natural. The essence of the workshop is to help you produce exiting wedding images.

Day II

09.00 – 12:00 uploading files & editing & discussion

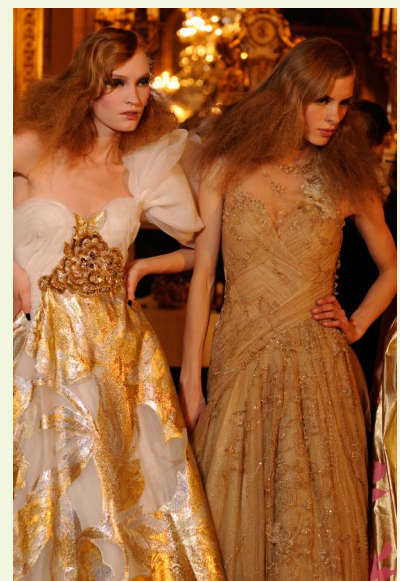

12:00 – 13:30 Lunch on your own

13:30 – 15:30 Class Instruction II

Looking at the images – Enhancing photographs using Lightroom, Photoshop and Nikon Selective tool software, finding your own style.

15:30 – 16:30 Break (Snack and Gear up)

16:30 – 18:00 Photo Shoot around Paris incorporating daylight, use of reflectors and flash techniques with a model.
